Special Issue on Gas-Phase Molecular Spectroscopy dedicated to the 75th birth anniversary of Professor Mihir Chowdhury

EDITORIAL

Chakraborty T:
Special issue on gas-phase molecular spectroscopy
dedicated to 75th birth anniversary of
Professor Mihir Chowdhury 157

ORIGINAL PAPERS

Shirhatti PR, Wategaonkar S:
Mass analyzed threshold ionization (MATI)
spectroscopy of *p*-cresol 159

Upadhyaya HP, Saha A, Kumar A, Naik PD:
Ultraviolet photodissociation dynamics of
trichloroethylene at 235 nm 165

Maity S, Naresh Patwari G:
Intermolecular structure on binary complexes
of water with phenylacetylene and its substituted
analogs: a combined spectroscopic and ab initio
investigation 173

Goswami T, Das DK, Karthick Kumar SK, Goswami D:
Chirp and polarization control of femtosecond
molecular fragmentation 181

Sinha RK, Singh BP, Kundu T:
Effect of electronic states coupling on methyl torsion in
3-methylisoquinoline 187

Sharma P, Das S, Badani PM, Vatsa RK:
Photochemistry of $(\text{CH}_3\text{SCH}_3)_n$ and $(\text{CH}_3\text{SSCH}_3)_n$
clusters at 355 and 532 nm using time-of-flight
mass spectrometer 195

Mukherjee M, Bandyopadhyay B, Biswas P, Chakraborty T:
Amine inversion effects on the IR spectra of aniline
in the gas phase and cold inert gas matrixes 201

Chakraborty S, Das P, Das PK:
Isomeric identification of methylated naphthalenes
using gas phase infrared spectroscopy 209

Ghosh S, Paul BK, Chakraborty A, Nath DN, Guchhait N:
Intramolecular charge transfer reaction
in 3-amino-4-methyl benzoic acid: a study
from condensed phase to jet-cooled
molecular beam 219

Mani D, Bhat VT, Vinoy KJ, Arunan E:
Towards a broadband chirped pulse Fourier
transform microwave spectrometer 225
