Contents

Astrophysics, Atmospheric & Space Physics

Noise temperature and attenuation due to clouds in microwave and millimetrewave frequency bands for satellite borne systems

P MALI, S K SARKAR AND A B BHATTACHARYA 497–503

Charged AdS black holes and test particles

FAROOK RAHAMAN AND MEHEDI KALAM 505–507

Atomic & Molecular Physics

Molecular orbital study of torsional potentials, physicochemical properties and electronic spectra of methyl acrylate in different electronic states

AJIT VIRDI, ARCHNA SHARMA AND V P GUPTA 509–514

General Physics

Ultrasonic study of 2-butanol in cyclohexane with toluene

L PALANIAPPAN 515–518

Ultrasonic studies in binary liquid mixtures

A ALI, A K NAIN, V K SHARMA AND S AHMAD 519–525

Optics & Spectroscopy

Univariate and bivariate characteristics of amplified spontaneous emission and coupled-mode optical systems

BIMAN DAS AND SHAUN GIAMMICHELE 527–531

Laser cooling of two-level atoms by two-photon transition

ARANYA B BHATTACHERJEE 533–537

Theoretical calculations on morphology dependent resonances of microparticles and their effects on the spontaneous emission of dye molecules

P SANDEEP AND PREM B BISHT 539–543

Plasma Physics

Entire spatial propagation characteristic of an intense laser beam in plasma : self-focusing and self-trapping due to ponderomotive nonlinearity

R K KHANNA AND R C CHOUHAN 545–553

Kinetic Alfvén wave in the presence of parallel electric field in an inhomogeneous magnetosphere

A K DWIVEDI, P VARMA AND M S TIWARI 555–563

Relativity & Cosmology

Non-null electromagnetic fields and compacted spin coefficient formalism in general relativity

ZAFAR AHSAN, NIKHAT AHSAN AND SHAHID ALI 565–570

Notes

Spectroscopic studies of paranitroaniline (PNA) doped in polymeric matrices PMMA and PVA

G PUROHIT AND G C JOSHI 571–573

Uniqueness of Schwarzschild solution

V D DESHPANDE, S V INGALE AND M V HANDORE 575–577

Forthcoming Publications (A) 579–580

Notes for Contributors 581–583

Announcements 585–590
