

Indian Journal of Physics B
Vol. 76B • No. 6 • December 2002

Contents

<i>Front Title</i>	687
<i>Board of Editors</i>	689–690
<i>Front Contents</i>	691–692
 Rapid Communication	
VLF observation during Leonid meteor shower–2002 from Kolkata, India	
SANDIP K CHAKRABARTI, S PAL, K ACHARYA, S MANDAL, S CHAKRABARTI, R KHAN AND B BOSE	693–697
 Astrophysics, Atmospheric & Space Physics	
A comparative study of Forbush decrease events of February and August, 1999	
PRASHANTI SHRIVASTAVA AND PANKAJ K SHRIVASTAVA	699–703
 Atomic & Molecular Physics	
Protonium formation in arbitrary excited states	
MANABESH BHATTACHARYA AND N C SIL	705–710
 General Physics	
Computer aided design of an electrostatic FIB system	
AHMAD K AHMAD, SABAH M JUMA AND AHMED A AL-TABBAKH	711–714
The dictates and the range of applicability of the laws of thermodynamics for developing an irreversible thermodynamical framework	
ANIL A BHALEKAR	715–721
 <i>I</i> -phase transition in liquid sulfur	
H YURTSEVEN AND Ö E PITIRLI	723–726
 Genetic algorithm based optimization for impedance bandwidth of microstrip patch antenna	
PINAKI MUKHERJEE AND BHASKAR GUPTA	727–730
 Theoretical studies of radiations from equilateral triangular microstrip antenna on ferrite substrate	
VISHWAS BHARDWAJ, VIJAY KR TIWARI, J S SAINI, K B SHARMA AND D BHATNAGAR	731–736

[Cont'd. on next page]

Optics & Spectroscopy

Diffraction efficiency of transient grating and relaxation profiles of some laser dyes

R JUSTIN RAJESH, MINI JOSE AND PREM B BISHT 737–742

Vibrational structure in the $E^1S^+ - X^1S^+$ transition in ^{70}GeS and ^{74}GeS

B J SHETTY, SUNANDA KRISHNAKUMAR AND T K BALASUBRAMANIAM 743–745

Relativity & Cosmology

Higher dimensional string cosmology in Lyra geometry

F RAHAMAN, S CHAKRABORTY, M HOSSAIN, N BEGUM AND J BERA 747–751

Note

Effect of impurity on the ground state of a system in a solvable three dimensional model

NAZAKAT ULLAH 753–755

Forthcoming Publications (A) 757–758*Notes for Contributors* 759–761*Announcements* 763–768*Index (Author and Subject)–2002* 769–791
