|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Front Title .....                                                                                                                                                                                                                   | 227     |
| Advisory Board and Editors .....                                                                                                                                                                                                    | 229-230 |
| From Editor's Desk : An Announcement .....                                                                                                                                                                                          | 231     |
| In Memoriam .....                                                                                                                                                                                                                   | 232     |
| Front Contents .....                                                                                                                                                                                                                | 233-234 |
| <b>Condensed Matter &amp; Materials Physics</b>                                                                                                                                                                                     |         |
| Effect of the parabolic confinement potential on the binding energy of a donor in a double-step barrier quantum dot<br>Y P VARSHNI .....                                                                                            | 235-237 |
| Compton scattering study of samarium<br>B L AHUJA, H MALHOTRA AND M SHARMA .....                                                                                                                                                    | 239-243 |
| Galvanic synthesis of copper microstructures on large areas of polymeric ion track membranes<br>SANJEEV KUMAR, SHYAM KUMAR AND S K CHAKARVARTI .....                                                                                | 245-249 |
| Spectroscopy of traps in $\text{Al}_2\text{O}_3$ / $\text{Al}_2\text{O}_3$ -based phosphors as determined by CGCD of glow curves<br>R K GARTIA, B ARUNKUMAR SHARMA, O BINOYKUMAR SINGH, S NABADWIP SINGH AND TH BASANTA SINGH ..... | 251-256 |
| Microstructure and initial permeability of Cd-substituted Li-Ni ferrites<br>C M KANAMADI, R G KHARABE, R B PUJAR AND B K CHOUGULE .....                                                                                             | 257-260 |
| Influence of temperature and frequency on the electrical parameters of a polycrystalline silver thallium selenide $\text{AgTlSe}$<br>A A M FARAG, S ABDEL RAHMAN AND A M IBRAHIM .....                                              | 261-266 |
| Electrical properties of cationic-substituted $\text{SrBi}_2\text{Ta}_2\text{O}_9$<br>RIZWANA, P SARAH AND G S KUMAR .....                                                                                                          | 267-272 |
| Relationships between electronic dielectric constants and interatomic separations in $\text{A}^{\text{NB}^{8-\text{N}}}$ type binary solids<br>B P SINGH, H S MAHOR AND S TRIPTI .....                                              | 273-277 |

**Nuclear Physics**

Characterization of some commercial polymers for the detection of massive cosmic ray particles

|                                                                                                      |         |
|------------------------------------------------------------------------------------------------------|---------|
| BASUDHARA BASU, AMAL MAZUMDAR, SIBAJI RAHA, SATYAJIT SAHA, SWAPAN K SAHA<br>AND DEBAPRIYO SYAM ..... | 279–283 |
|------------------------------------------------------------------------------------------------------|---------|

**Notes**

Structure analysis of 3b-acetoxy-12-keto-(25R)-5b-spirostanol acetate

|                                                                |         |
|----------------------------------------------------------------|---------|
| RAJNIKANT, DINESH, MOUSMI, NUSRAT AZIZ AND BABU VARGHESE ..... | 285–287 |
|----------------------------------------------------------------|---------|

Structure of 3'-5'-dimethyl-6-methoxy 4-2'-benzo[b] furanyl coumarin

|                                                                     |         |
|---------------------------------------------------------------------|---------|
| K V ARJUNA GOWDA, I A KHAN, M V KULKARNI AND N C SHIVAPRAKASH ..... | 289–292 |
|---------------------------------------------------------------------|---------|

Characterisation of hot material erupted from Mahanadi riverbank using EDXRF and XRD techniques

|                                                                                                      |         |
|------------------------------------------------------------------------------------------------------|---------|
| B MALICK, T R RAUTRAY, P K NAYAK, V VIJAYAN, P SINGH, R C BEHERA, T PATEL<br>AND R K CHOUDHURY ..... | 293–296 |
|------------------------------------------------------------------------------------------------------|---------|

Synthesis and characterization of two derivatives of 2-mercapto-3-m-tolyl-3H-quinazolin-4-one

|                                                          |         |
|----------------------------------------------------------|---------|
| M B DESHMUKH, SAVITA DHONGADE-DESAI AND S S CHAVAN ..... | 297–299 |
|----------------------------------------------------------|---------|

Empirical relations for the field dependence of electron mobility in InSb

|                                                                    |         |
|--------------------------------------------------------------------|---------|
| DUTIKRUSHNA PANDA, C K SARKAR, D MUKHOPADHYAY AND P S MALICK ..... | 301–303 |
|--------------------------------------------------------------------|---------|

Effect of organic impurities on the nucleation parameters of KDP single crystals

|                   |         |
|-------------------|---------|
| C MAHADEVAN ..... | 305–307 |
|-------------------|---------|

Dielectric properties and dc conductivity of lampblack

|                                                                   |         |
|-------------------------------------------------------------------|---------|
| K NOMITA DEVI, H BASANTAKUMAR SHARMA AND H NANDAKUMAR SARMA ..... | 309–311 |
|-------------------------------------------------------------------|---------|

$\text{Eu}^{3+}$  @  $\text{Sm}^{3+}$  energy transfer in CaS phosphor

|                                                |         |
|------------------------------------------------|---------|
| VIJAY SINGH, MANOJ TIWARI AND S J DHOBLE ..... | 313–315 |
|------------------------------------------------|---------|

Excitation functions of neutron induced reactions on  $^{52}\text{Cr}$ ,  $^{54}\text{Cr}$  and  $^{56}\text{Fe}$

|                                        |         |
|----------------------------------------|---------|
| SNEH LATA GOYAL AND R K MOHINDRA ..... | 317–321 |
|----------------------------------------|---------|

Validity of negative binomial distribution among the target fragments emitted in high energy h–A interactions

|                                                                                                       |         |
|-------------------------------------------------------------------------------------------------------|---------|
| DIPAK GHOSH, ARGHA DEB, PRABHAT BANDYOPADHYAY, ANIT GHOSH, MITALI MONDAL<br>AND RANJAN SENGUPTA ..... | 323–325 |
|-------------------------------------------------------------------------------------------------------|---------|

|                          |     |
|--------------------------|-----|
| <b>Book Review</b> ..... | 327 |
|--------------------------|-----|

|                                       |         |
|---------------------------------------|---------|
| <b>Forthcoming Publications</b> ..... | 329–330 |
|---------------------------------------|---------|

|                                     |         |
|-------------------------------------|---------|
| <b>Notes for Contributors</b> ..... | 331–333 |
|-------------------------------------|---------|

|                                       |         |
|---------------------------------------|---------|
| <b>Our Special Publications</b> ..... | 335–336 |
|---------------------------------------|---------|

|                            |         |
|----------------------------|---------|
| <b>Announcements</b> ..... | 337–340 |
|----------------------------|---------|

|                      |         |
|----------------------|---------|
