

IEEE C. V. Raman Milestone Lecture

presented by

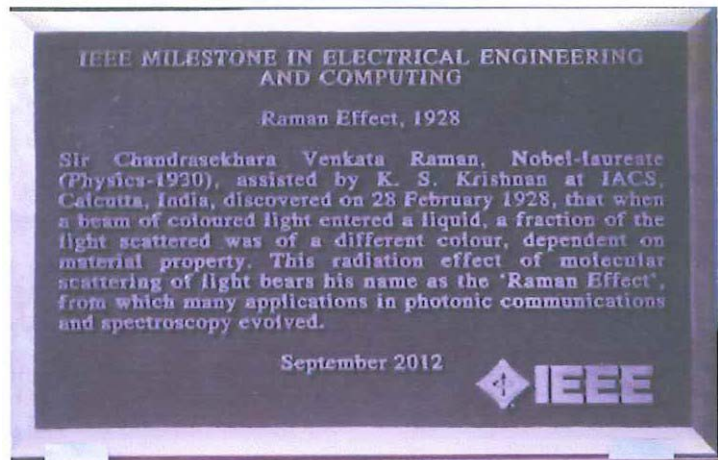

IEEE Kolkata Section

Dr. Mahendra Lal Sircar Hall

Indian Association for the Cultivation of Science, Jadavpur

Monday, December 18, 2017 • Time: 3:00PM

Speaker

Prof. Raj Mittra

Pennsylvania State University, USA

Meta-atoms -the building blocks of Future Materials for Electromagnetic Devices

Raj Mittra is among the first to recognize the computer's potential for solving large-scale electromagnetic problems. He is also a contributing editor of "Computer Techniques for Electromagnetics," the first definitive book on computational electromagnetics. His research indeed revolutionized computational electromagnetics, resulting in many antenna, radome, scattering and microwave applications.

An IEEE Life Fellow, Dr. Mittra is the former president of the IEEE Antennas and Propagation Society and was the editor-in-chief of IEEE Transactions on Antennas and Propagation.
