| <b>Title:</b>    | Topics in Physics and Mathematics                                                                                                                                                                                   |
| <b>Speaker:</b>  | Siddhartha Sen, Trinity College, Dublin, Ireland                                                                                                                                                                    |
| <b>Date:</b>     | November 20 (Wednesday), 21 (Thursday), 26(Tuesday) and 27 (Wednesday), 2019                                                                                                                                        |
| <b>Time:</b>     | 15:00 Hours                                                                                                                                                                                                         |
| <b>Venue:</b>    | Physics Seminar Room (C-406), 3rd Floor, Centenary Building, IACS                                                                                                                                                   |
| <b>Abstract:</b> | In these lectures the usefulness of qualitative reasoning for solving problems in physics and mathematics will be demonstrated through examples.No prior knowledge of the problems to be discussed will be assumed. |

**All are cordially invited to attend the seminar**
