

INDIAN ASSOCIATION FOR THE CULTIVATION OF SCIENCE

2A & 2B, Raja S.C. Mullick Road, Jadavpur, Kolkata-700032, India

Seminar Notice

Title:	Late Time Cosmology in Modified Theories of Gravity
Speaker:	Md.Wali Hossain, Center for High Energy Physics, KNU, Daegu, Korea
Date:	January 21, 2020 (Tuesday)
Time:	16:00 Hours
Venue:	Physics Seminar Room (C406), 3rd Floor, Centenary Building, IACS
Abstract:	The simplest explanation for the late time acceleration can be a cosmological constant. This is also the most favoured candidate by the observations. But it has to be very fine tuned. So we look for other models which I will discuss in this talk. The main focus will be on the scenario of modified theories of gravity.

All are cordially invited to attend the seminar

With regards,

Prof. U. Chattopadhyay, School of Physical Sciences
